15:28 27Aug08 -CORRECTED-(OFFICIAL)-Perfect Wind to invest 210 mln euros in Turkey

(Corrects to show Perfect Wind is owned by Akuo Energy, not Spain's Iberdrola, after company corrected its statement)

ISTANBUL, Aug 26 (Reuters) - French wind power producer Perfect Wind will invest 210 million euros (\$306 million) in Turkey for a 150 megawatt wind power station, the company said in a statement on Tuesday.

The company, owned by Akuo Energy, plans to invest a minimum of 1.5 billion euros in Turkey's nearly undeveloped renewable energy sector in the next five years.

Turkey has a long coast in the sun-baked Mediterranean region, but investments in wind and solar energy are rare and the country imports most of its energy for consumption.

The country plans to construct a \$7.5 billion nuclear power plant in a bid to reduce its reliance on imported energy.
