French independent power producer [Akuo](#) has commissioned a [50 MW solar plant](#) in Kita, about 180 km west of Bamako, in the Kayes region of Mali.

According to the company, the facility is the largest solar park in West Africa. "This plant is contributing to reducing the country's-dependence on hydroelectricity – currently jeopardized by climate change – and vis-a-vis imported fossil fuel and the use of wood fuel from the country's natural forests," it said.
